I also have a Tapsonic TOP and I'll compare it. - I have to watch the ad 30 seconds in full before I play any music... it's too much and makes me not want to play the game for a long time. -No ad fee version i paid? TOP because it allows me to play any song without nonsense meat, but at the expense of ads. I have complained about Cymbal notes are too difficult to notice and devs listen. I still can't give 5 stars because I happened to play this game on a plane without the internet and this renovation arrived while I was on the plane. When I reconnect, I'm stuck on the loading screen, I open the game again and I'm prompted to update the program. After updating, I found that I made all my offline progress, including full combos and several legendary gold coins, and now this version can somehow be stuck on the loading screen with the in-game UI layered on top after the song is complete. I guess it's probably because of the bad internet, but at least it's better to say that the internet is bad and go on instead of getting the game caught. The best solution is to store the local score first and then sync it in the background. High scores are stored after the program restarts. But this error is still very annoying. Also, with the internet slow, DLC stores may have the wrong image on the list if I scroll too fast. Please edit my first experience with the game, including the ads I can't skip, so I failed. When I try and finish the music, the game will freeze. Looking through it, the game is ok. However, it must be paid (real cash) for all the songs you need.
